

INSTRUMENTATION & VALVES

YOKOGAWA

Temperature/Pressure/Flow Measurement, Tunable Diode Laser, Gas and Liquid Analyzers, DCS Systems, Data Acquisition, Recorders, Controllers, Process Gas Chromatographs

Gas Detectors, Flame Detectors, Wet Well/Odor Monitors, Customized Gas Sampling Systems

Plug Valves, Butterfly Valves, Rotary Control Valves, Knife Gate Valves, Ported Gate Valves, Consistency Transmitters, Actuators, Accessories, APCO Valves

Valtek process control valves for all industrial applications

Armstrong International provides Steam Traps, PRV's, Control Valves, Air/Gas Vents, and Heat Transfer (Coils)

Panametrics flow meters for industrial and municipal control including ultrasonic portables

Tubing bundles, Instrument Enclosures, Instrument Supports

Drexelbrook provides the widest offering of product solutions to the level and analytical measurements

Process Control Valves, Sanitary Control Valves, High Flow Regulators, Tank Pressure/Vacuum Vents, Flame Arrestors

Pentair Thermal Management is now nVent. Leak Detection, Sensing Cables, Alarm Modules

Rugged "Dual-Snap" disc spring and advance sensing technologies

Severe service isolation and control ball valves for the most extreme applications

TRU-FLO is a leading Manufacturer of Stainless Steel Valves and Automation Technologies

Industrial Communication Systems, Industrial Controls, Radio Controls. (Alaska only)

Reotemp offers a wide variety of temperature and pressure instruments that can be used within a broad spectrum of industries.

Valve Automation & Actuation

Custom Designed Solutions
For Your Project Needs

Your partner for superior service, world-class products, and local valve automation expertise

CB Pacific is a leading distributor of valve automation equipment in the Northwest. We offer service and product expertise from a broad range of manufacturers. At our local facility, we provide assembly and testing of the valve systems to ensure that our deployed solutions will meet and exceed customer expectations.

■ Local Support

With several locations across the US, we are your complete source for all valve automation requirements.

■ Technical Expertise

Our technical team specializes in helping customers solve problems and select the right products for their specific valve and actuation applications.

■ Quality Control

Actuators, limit switches, solenoid valves, positioners, tubing, and accessories are mounted, calibrated, and tested.

■ Service & Support

Our team is committed to providing dependable, consistent service. We offer the guidance and assistance you need, no matter what size the job.

Customized Automation & Controls

From simple to complex, standard to custom, pneumatic, electric, or hydraulic, we are experts in valve automation.

Assemblies

- Stem extensions
- Tee assemblies
- Valve stem inserts
- Low/high temperature mounting kits
- Cryogenic applications
- Boiler applications
- Other steam applications

Finishes

- Carbon steel
- Stainless steel
- Other materials available
- Powder-coating color

Accessories

- Control panel
- External battery backup

All actuated valve packages leave our facility completely assembled, tested and certified.
